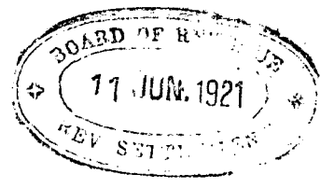
OFFICE OF THE Collector of South Kanara.
STATION Mangalore,
Date 7th June 1921.



From

R. H. Ellis, Esquire, I.C.S.,
Collector of South Kanara.

To

The Secretary to the Board,
Revenue Settlement, Madras.

SIR,

Monsoon school of village officers for checking survey records.

A copy of the programme for a monsoon school to be held in each Taluk for 2½ months during the monsoon is enclosed. A monsoon school is absolutely necessary to rectify errors and supply omissions in the village and Taluk records. No additional establishment will be necessary to conduct the school. Two of the best Revenue Inspectors in each Taluk will be selected to manage the school under the supervision of the Taluk Tahsildar, and during their absence on this duty, the neighbouring Inspectors will be put in charge of their firkas. As the jurisdiction of each Revenue Inspector will be somewhat curtailed owing to the redistribution of the firkas consequent on the amalgamation of the Land Records Inspectors with the Revenue Inspectors it will be possible for one Inspector to hold two charges for a time. I propose to carry out the arrangements in anticipation that the Board will have no objection.

2. There are large arrears of sub divisions to be scrutinized and plotted in the Field Measurement Books. The Temporary Draughtsmen in the Land Records Tahsildar's Office were doing this work under his supervision. These posts --

have now been abolished and no special arrangement has been made to carry on this work. Orders of the Government regarding the future Land Records work have not yet been received and even when received the arrangement made will probably not be sufficient to cope effectively with the arrears as it would require the entertainment of a staff equal to the old Land Records staff to do this. Meanwhile new sub divisions will continue to be sanctioned by the Tahsildars and Deputy Tahsildars tending to add to the arrears. I am, therefore, anxious to get the number of pending sub divisions reduced as far as possible and the only means of doing so, appears to be by making as much use as possible of the monsoon school in the manner described in paragraph 1 of the enclosed circular issued for the guidance of the monsoon school.

L Ismail Khan

R. H. Ellis. Esquire, I.C.S.,
Collector of South Kanara.

Circular.

The usual monsoon school of shanbhogues will be held this year also at each Taluk Headquarters from 1st July 1921 to 15th September 1921. The school will be conducted by two of the best Revenue Inspectors in the Taluk under the supervision of the Tahsildar. The following items of work will be attended to

1. Scrutinizing newly formed survey fields and sub divisions and mapping in the Taluk copy of the Field Measurement Book such of these as are free from defect. The scrutiny will be done by the Revenue Inspectors with the aid of the shanbhogues, that is by giving one shanbhogue for scrutiny the work of another shanbhogue. The Revenue Inspectors will overcheck the shanbhogues work and obtain the Tahsildar's orders for plotting the sketches which are found to be free from technical defects. In the case of defective sketches the Revenue Inspectors will put up for Tahsildar's approval draft endorsements pointing out the defects and requiring the Revenue Inspectors concerned to carry out the necessary corrections. These references will be noted by the Taluk Clerk in his registers and issued like other references from the Taluk Office. The Revenue Inspectors and the shanbhogues will carry out the scrutiny according to the instructions in Appendix I to the sub division circular issued with this office Dis.No.2127/D/Rev/20, dated 6th August 1920. The Revenue Inspectors will exchange between them for overcheck the sketches in which they are concerned either because the sketches relate to their firkas or because they are sketches which have been checkmeasured and passed by them in the first instance.

2. Comparing the Taluk copy of the Field Measurement Book with the Karnam's copy field by field and carrying out the

subsequent alterations if any, omitted from either.

3. Correcting the side numbers of fields affected by the formation of new survey fields and noting the part measurements of "F" lines in both the copies of the Field Measurement Book - wherever they have been omitted.

4. Plotting the new fields formed from waste blocks in the waste block sketch (hill sketch) contained in both the copies of the Field Measurement Book and noting on the sketch the area of the fields so formed. The areas of the new fields should be - checked and totalled.

5. Comparing the portions of both copies of the settlement register which were written last year in the monsoon school.

6. Checking village account No. 3 for faslis 1329 and 1330 with the Taluk Register 8-A, Settlement register and Field Measurement Book to see if all sub divisions formed during that period have been entered in 8-A, registered in the Settlement - register and mapped in the Field Measurement Book. A list of omissions, if any, should be prepared.

7. Revising the demarcation sketch books and the stone registers with reference to the latest orders of the Board of - Revenue.

2. The Revenue Inspectors will get these items of work done with the assistance of shanbhogues who will be summoned to the Taluk Office in batches. They will issue instructions to the shanbhogues through the Tahsildar as to what items of work they should do in the villages before they attend the Taluk Office. The Tahsildar will see that the shanbhogues appear before the - Revenue Inspectors in time in batches so that they may not be - unduly detained at the Taluk Offices away from their villages, that the Revenue Inspectors are supplied promptly with the necessary village and Taluk records and that they attend to their work systematically. Defaulting shanbhogues should be reported

to the Divisional Officer for punishment. The Revenue ------- Inspectors should submit to the Tahsildar weekly progress reports showing the items of work done by them each day. Their monthly diary should specify the items of work done each day. The --- different items of work prescribed in this circular should be - written in the heading of the several columns of the diary and the work done day by day should be recorded under these headings mentioning in column 2 the village or villages to which each -- day's work relates.

3. The Tahsildars should supervise the work done in the --- monsoon schools and submit at the close of the period a report - on the work done so as to reach the Collector by the 25th ----- September.

South Kanara Collector's Office,
